EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Linda Russell on 12-1-2004.

The application has been amended as follows: On page 7 of the specification, line 16, change "compressor 21" to --compressor 22--.

In line 2 of claim 3, change "a refrigeration cycle" to --the refrigeration cycle--.

In line 1 of claim 8, change "the electricity" to --electricity--.

In line 2 of claim 13, change "a natural gas" to --the natural gas--.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: While the various parts of applicant's invention are known, no reference can be found with all of the components, or a motivation to combine the various components. Smith et al (6,141,950) shows a combustion turbine with a compressor which compresses an air stream which is split between a combustor and an air separation with the oxygen being possibly supplied to a fuel conversion device (column 3 lines 4-6) (portions a-c of claim 1). Ha et al (6,508,053), which was published less than a year before the filing of the present case and after the priority date and is commonly assigned with the current

application, shows a gas turbine with an air compressor and an air separator that feeds nitrogen upstream of the turbine (a,b and d of claim 1). Kikkawa et al and Liu et al (5,689,141 and 5,139,548) show natural gas liquefaction systems that power compressors for a refrigeration system with gas turbines (e of claim 1). While the above references disclose the components of applicant's invention, none of the references contains motivation to combine the references. No teaching can be found of a system which liquefies a portion of a natural gas stream while sending the other portion to a conversion unit or reformer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William C Doerrler whose telephone number is (571) 272-4807. The examiner can normally be reached on Monday-Friday 6:30-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Denise Esquivel can be reached on (571) 272-4808. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
